

medisked connect

Centralize and Manage Information Across Your Provider Agency

Comprehensive Tools for Provider Agencies

MediSked Connect centralizes and manages information in order to transform service delivery across provider agencies with simple modules for scheduling, billing, individual plans and outcomes, reporting, and documentation. Comply with the 21st Century Cures Act using the integrated Electronic Visit Verification (EVV) solution including mobile capabilities. Connect ensures that staff time is focused where it belongs – on improving the lives of individuals.

Centralized Electronic Records

View individual demographics, manage circles of support, access plans, attach files, and configure additional data fields.

Streamline Administration

Monitor quality, compliance, and performance through a variety of standard and custom reports.

Claims & Billing

HIPAA compliant claims submissions and tools to manage the billing lifecycle.

Clinical Data

Manage, track, and report on ICD-10 codes for diagnoses and conditions.

Record, Track, and Report on Immunizations

Such as flu shots and COVID-19 vaccinations.

Easily Document Service Notes

Add notes, progress, outcomes, observations, and charting data.

Manage User Roles

Create and update user roles and permissions in a central location with permissions grouped by category.

Alerts

Set user-selected alerts for updates to plans, notes, changes to individual/employee demographics.

Integrate with MediSked Portal for Connect

Empower the individual's choice, voice, and communications.
