Sandata

I/DD Client Care

Spend more time on client care and less time on paperwork!

With Sandata Client Care designed specifically for I/DD agencies, you can eliminate the cumbersome paperwork for your staff and streamline processes at every level of your organization — all in a fully-configurable tool completely mobile on any device.

With Sandata's Client Care all services are tracked electronically, eliminating time-consuming, error-prone paperwork and freeing staff to do what they do best… provide high-quality care.

In addition, Client Care works seamlessly with Sandata's other software allowing you to create a tailor-made system that empowers you and your staff to provide the best care to your clients.

"Sandata completely understands the challenges of I/DD. The fact that Client Care is completely configurable at every touchpoint — from overall organizational workflow processes down to individual client care plans — was a game-changer for us!"

Key functionality includes:

- Audit who changed what and when
- Assign permissions for viewing and changing fields
- Create customized reports
- Use robust filters to filter, sort and find information
- Import/export data using Excel
- Access data 24/7 via the web (smart phones, tablets, notebooks, and desktops)

Client Care = Complete Care.

Check out the following list of functionality for yourself.

Client Information
Track contact, demographic, payment information, and more, all in one place.

Program Planning
Track individual program plans, assessments, goals, successes, and more.

Messaging
Send messages to one or more DSPs.

Dashboards
Track and define user access, tasks/reminders, caregiver dashboards and client dashboards.

Miscellaneous Data Collection
Get the data you need when you need it. Track vitals, data, and incidents from intake to discharge.

The Sandata difference

With over 40 years supporting agencies, providers and payers across the country, Sandata brings experience, innovation, and a customer-centric approach that makes it possible to get more right from the start.
